

Technical Specifications:

- Wire & round material pre-feeder.
- Operating voltage 120-240VAC 50/60Hz (Internally switched)
- Power consumption 150 VA
- Air pressure – Minimum 80psi
- Programmable feeding speed 0 – 2.8m/s
- Programmable belt pressure with feedback monitoring.
- Low pressure detection shutdown.
- External equipment signalling and integration.
- Reversible feed direction.
- Integrated material rotary guide.
- Material size from 0.5mm – 14.5mm
- Optional material out detection system.
- Optional material size from 0.5mm – 40mm
- HMI LCD screen with status display, manual mode, and diagnostics.
- Strong polycarbonate hinged interlocked safety guard
- Weight approx. 29kg
- Dimensions LxDxH (base machine) 405x460x420
- Optional; Strong welded frame floor stand with braked material axle, roller material demand sensing system, optical material demand sensing system, motor system upgrade for heavy wire reels >60kg
